

# IMPROVE BLEND AND QUALITY OF YOUR HIGH VALUE PRODUCTS!

**New food and pharma line of mixers. For your needs today and for tomorrow!**

You develop new products and processes. New equipment technology is essential for making up and releasing new recipes. Bergius unique selection of mixer manufacturers makes your intentions and goals possible. With our experience and the specific know-how by our principals you will have the optimal equipment offered and installed – to meet your needs today – and for tomorrow.

**WINKWORTH MACHINERY** has been designing and manufacturing world class mixers for mixing powders, creams, batters, pastes, sludges, slurries and granules. With Winkworth we aim to expand into the non fluent and solid mixing market. Winkworth Mixers include: Z Blade, Ribbon, Kneaders, Paddle and Double Cone Blenders for use in a wide range of industries. With Winkworths experience since 1928 Bergius feel trust to provide unbeatable customer support and equipment performance. You are welcome to test us.

**LIGHTNIN®** has over 85 years of unrivalled experience in mixing technology and more than 60 years in efficient gas dispersing such as for fermentation and hydrogenation. New developments of impellers and drives make reality of your wishes. Why choose between improving the process on one hand and using the latest drive design on the other, when you now can have all features in one mixer.

LIGHTNIN is an **SPX** brand

**MASUKO SANGYO Co.Ltd** manufactures and delivers Ultra-Fine mills such as Micro-Meister, Ceren-Meister and Supermasscolloider. Mills which can process raw materials into smooth paste. MASUKO is well known for robust units and patented anti-bacterial grinders.

**MICROFLUIDICS Corp** offers leading high-performance cell disruption, micro-encapsulation and high shear fluid processing through its patented Microfluidizer® processors. This to reduce particles and droplets to uniform micron and nano-scale sizes and disperse them homogeneously.

**STATIFLO Int. Ltd** continues through experience, innovation and inspiration to strengthen its reputation as the leader in static mixers worldwide. If you like to blend your pharmaceutical products in-line without moving parts and seals – ask us!

**STERIDOSE** is highly specialized in design, development and manufacturing of aseptic Mag-Drive mixers, valves, connectors and sampling systems. Sterimixer®, Sterivalve®, Steriflange® and Sterisample® are registered trademarks of Steridose. The unique design of Sterimixer® impeller has over the years made it into a market standard.

**YSTRAL GmbH** develops advanced mixers based on the rotor/stator principle for tank mixing or in-line use. The technology is excellent for creating a homogenous result in short time, especially when making emulsions or to avoid agglomerates from thickeners. New designs also make it possible to inject powders directly into the mixers. The usage of valuable ingredients is optimized and units can be built for dust free operation.
